## Customer Reviews

I have received this product at a discounted price in return for my honest review of my experience with and the quality of the item. Side note, I received this product in a very timely manner and it was packaged very well so it was not damaged at all when I received it. These books are absolutely amazing for anyone that is preparing for any type of quiz because they are absolutely full of information. This makes sure that you are completely prepared for when you finally sit down for the exam. My favorite part of the book is all of the practice questions that it has to make you feel more comfortable with the format of the test. I also love that they explain the answers very thoroughly to make sure that you learn from your mistakes and are actively learning the information. This is definitely guaranteed to improve your score on your exam. Good Luck! I try to provide very helpful reviews to give some insight before purchases, so if you appreciated this review at all, please click

the "yes" button for me! Also, I do not get paid for any of my reviews and I am in no way rewarded for giving higher star ratings. My "payment" is a discounted item and that is given before my review so I am not obligated to give a more positive review. My ratings are also based solely on my personal experience and thoughts on the product, high score or low score. Thank you - have a great day!

This is great for ASVAB prep: just a solid 200 pages of practice! I feel pretty comfortable with the material already, so it's just been a matter of 1) getting used to taking a test and 2) working quickly enough. Therefore this practice has been an immense help. It also includes some pages in the front to acquaint you with the test, number of questions, timing, etc. that I appreciated. No complaints here! A steal at \$15, in my opinion

By far one of the top review books I have gotten. Lots of great information and test questions. Highly recommended.
